# S.S.S. A LASTING CURE

has made S. S. S. the most extensively used of all medicines in the treat-ment of Contagious Blood Poison. Unlike the strong mineral mixtures, which temporarily remove the outward symptoms and shut the disease up in the system, there to carry on its destructive work on the delicate and vital organs, S. S. S. strikes directly at the root, and by purifying the blood of every trace of the virus, completely and permanently cures the trouble. S. S. S. is Nature's blood purifier, harmless in its action and certain in its good results. It is made from a combination of roots and herbs, each of which has a definite and specific action in purifying the blood. Years were spent in selecting and proportioning the different ingredients, but when S. S. S. was perfected it soon demonstrated its superiority over all other blood medicines, and now, after 40 years, it is suil the one and only certain cure for Contagious Blood Poison. While driving out the poison from the circulation S. S. S. builds up and strengthens the system by its line vegetable. tonic effects. If you are suffering with Contagious Blood Poison S. S. S. is your most certain reliance, and because of its freedom from mercury, potash or any other mineral, it is absolutely safe for every one. Indications that the Ore Is Rich and Plentiful; Ray Mining News.

Ray, Ariz. May 22.—J. Park Chan-ning the moving spirit of the Minni Copper company, passed through Bay on his way from a brief trip to the properties of the Magma Copper comproperties of the Magma Copper company, at Superior. Although he gave
no information as to the purpose of
his violt, the fact that such an eminent
authority as he has inspected a mine
which has not yet passed the inceptive
period, has occasioned more than passing notice. Coupled with this is the
fact that the United States government has only recently published the
topographical map of the mineralised.
Superior ground which Dr. Ransome
made late last fail.
There does not appear to be any

Superior ground which Dr. Ransonse made late last fail.

There does not appear to be any doubt as to the richness of the Magma haldings and recent explorative work. It's disclosed the fact that the quantity of ore is vast and permissible of economic extraction. The contents in copper and precious metals of the ore which is being simost constantly shipped from Florence, 25 miles form the mine, is no unusually high that no one with authority to speak for the concern chains that the richness will endure with acptin and extensive development work. But they have ample grounds for the argumption that ore of the first grade, which needs no concentration, will be produced for several years.

A force of 160 men is employed at tells the news. It Paso has learne tures are more than met by the returns from the shipments, all of which are shalled to the railway by teams. Negotietless with the Arizona Eastern rail-

Has Produced 40,000 to 60,000 Pounds of Ore a Month
For Years.

(By L. H. Davis.)

"Parral, Mexico, is one of the biggest mining camps of northern Mexico," says Leopold iwonaky, a prominent mine owner and operator, who is temporarily sojourning in El Paso as a member of the foreign colony of refugees from Mexico, "It has a great future, far greater than its past, owing to the enormous bodies of ore available and the modern methods and cheap motive power soon to be introduced from the electric power prant to be installed at the big Concho fiver dam, so that the low grade ores will become to the enormous bodies of ore available and the modern methods and cheap motive power soon to be introduced from the result has been made. The close preximity of the smelter at Hayden obviates the necessity of installing a reduction plant, though its life would be a certainty should it be competted to continue sending its product to the smelter at E) Paso. Genn and Thompson, of Sait Lake Citx, are fiscal agenta for the company and there is no stock apon the market. Its prospects are probably brighter than any other immature mining corporation in Arizom today.

Geo. Williams and John Dearmitt hars started work on their claims in the Red Hills district, 15 miles south of Wester station. They have damped a considerable quantity of picked ore, the averages of which run from 20 to 50 percent copper, and within the next two weeks will commence shipping in a moderate way.

R. C. Noland has returned from a five days stay in the Globe district, where he went to look after the preliminaties of the extensive drill work to be done on the properties recently acquired by the Guggenheim intervals.

stalled at the present time."

Hammoth Lodes,
The big production mines of the Paral camps are on the famous Veta Colorado Iode, a ledge which extends for over four kilometers, having a whith in several parts where exposed of over

Bounuss Mines. The mines that are at present being worked are the Presna, the Saito, the San Francisco, Veta Grande, the Quebradillas (of the Veta Colorado Mining company). Los Muertos (of the Sistra Plata Mining company), the Terreritos, the San Antonio the Remedios group of mines, which have recently been purchased by the San Rafael Mining company, of Pachuca, and the Palmilla mines, which are being developed and prepared for large operations as soon as the cheap electrical power is available.

Drumps Yield Well.

Instalment of New Equipment Finished: Four Veins in Property.

MINING NEWS

Globe, Ariz. May 22.—At the Copper Reef mine, 15 miles south of San Car-los, the erection of the new equipment is finished and the development of the

is finished and the derelopment of the mine has been resumed. The equipment consists of an ingersoll-Rand five-drill air compressor, driven by a 60 horsepower improved Stover low grade distillate engine, and a small pump for furnishing water to the mine and camp. Everything is in running order, and en May IT the driving of two headings was resumed, namely, the California tunnel, which is now about 1000 feet long, and the California drift, leading off from this tunnel. A two and three-quarter ingersoll-Rand air drill is being used in each heading. The pump is driven by compressed air and furnishes about 60 gallons per minute.

gallons per minute.

Chas Saxman is superintendent, Dan
McDonaid foreman, and Harry Faull

that vein.

The Santa Ana and Petosi groups of mines have also been acquired by the same company. They have also been jarge producers and will be actively developed as soon as the business conditions of Mexico will permit.

In the Resolano group of mines Gambusino have recently been working constantly and have discovered, almost from the grass roots, new and large over bodies and are shipping the product to the Aivarado mill.

Some development work has also been done very recently with vary good results on the Perin group, near the San Patriclo mine. McDonald foreman, and Harry Fauli chief clerk.

At present only two shifts are working, but it is intended to put on a third shift in a few days and drive the tunnel and drift with all possible speed. The property is traversed by four large veins with good surface showings of copper, and the tunnel will cut them at depths of from 1000 to 1200 feet.

Congreting Started at Kingdom.

copper, and the tunner will cur them at depths of from 1000 to 1200 feet.

Concreting Startes at Kingdom.

At the Kingdom shaft of the United Globe mine of the Old Dominion company, the cenerating of the fourth section has been started and with be finished in about 10 days. The concrete work is fully completed to a depth of 555 feet. The fourth section was started at a depth of 710 feet, and the concrete will be poured in around the forms until the bottom of the third section, at the 525 foot point, is reached, which will the give 710 feet of completed lining.

The next section will be the last, as the ground below the bottom of the fourth section is quite firm and soild, making it possible to take the remaining distance of 120 feet in one section. This will take it to the 12th lavel, which is 1000 feet below the collar of the shaft, the distance called for in the contract. Big Mills.

The Alvarado mill has been operating constantly, treating 150 tons of ore a day, notwithstandnig the revolutionary trouble. It is expected, as soon as the trouble is over, that work will be inaugurated in that district on a very large scale. A great future is expected for the district as soon as the cheap electrical power is available. All mining men in that district are looking forward with great interest and expectation to the installation of the Ginther power plant of the canadian company, which will transmit to the neighboring camps of Parral, Santa Barbara and Minus Nuevas abou 25,000 horse-power.

contract.
Three shifts are being worked and about 25 men are employed. C. H. Weldeman and Paul Michaelson, contracting and construction engineers,

are doing the job. Harrington Resigns. Harrington Resigns.

Jack P. Harrington, better known to his friends as "Slasher" Harrington, has resigned his position as foreman at the Superior & Boston and has accepted a similar position under superintendent Thomas Tighe at National, Nevada. He will leave for National on the first of the month. Mr. Harrington is one of the best known miners in Arizona and holds the record for tun-pel work in the southwest, having driven the main tunnel at the Inspiration mine 353 feet in 28 days. He also holds the record for standard shaft work in this district. Mr. [wonsky is interested not only in the Parral district, but also in the rich old camp of Guancevi, about 100 miles southwest of Parral, in the state of Durango, which camp has a record of production of systemal hundred militons of dellars. He is also interested in the Paleros and Trigueros mines in that camp, belonging to the Campania Minera Exploradora Explotadora de Guanacevi, which are in active operation and have been heavy shippers of gold, aliver, copper and lead ores, as well as sillicious ores carrying gold and silver. He is a native of Parral, of German parentago and was aducated in the United States.

"In conclusion," says Mr. Iwonsky, "I will state without hesitation that the Parral district is the greatest mining district in Mexico, and I believe in the world. Its ore bodies are inexnaustible and its veins are enormous. The ground has barely been scratched, comparatively speaking, although worked under ancient methods for centuries. The introduction of cheap power from the Concho river power plant will simply revolutionize the old district.

Just before the last revolution broke out the money was raised and arrangements made to construct the railroad

Baccalaureate Sermon Is Preached by Dr. Garrison-Many Present.

State College, N. M. May 22.—Sidney Kirkpatrick, a graduate from the sten-ography department and now empoyed as head clerk and stenographer in the state engineers office at Santa Fe, is here to witness the closing events of commencement week.

state engineer's office at Santa Fe. is here to witness the closing events of commencement week.

The students taking part in the musical program were Olaf Windsor, Edith Burke, Solon Hobinson, Chas. Briggs. After the program a large crowd assembled at the gymnasium for an hour of impromptu dancing—lust enough to get in practice for the students are leaving for their homes. Most of them, however, are anxious to remain till the end and Friday.

Miss Clara Thompson is spending commencement with her sister. Miss Ruth, who is a member of the gradualing class. The other members are. J. A. anderson, Olaf Windsor, Leslis Herman, John Haggart, Richard Quessenberry and Arthur Laferriere.

Miss Fannie Ford is taking an M. S. and has spent a great deal of time in preparing a thesis on Birds in New Mexico. It will probably be issued as one of the regular college bulletins.

Mrs. Maciver, who has been quite ill with ergipelas, is improving. Her daughter, Miss Ivander, or El Paso, is still with her.

Dr. Garrison preached a most interesting baccalaureate sermon to a very crowded house. The seniors appeared for the first time in their caps and gowns un Baccalaureate Sunday.

FASPERN CAPITAL to a depth of 480 feet and it is likely that when the present contract is completed that another contract will be not for an additional 100 feet.

Billie Finch, a former shift boss at the Misant mine, and who for the past two years has been foreman at the Ray Central, has accepted a position as general mine foreman at the Inspiration and is now in charge.

E. M. White, manager of the Warrior Development company, who was arrested the first of the week charged with attempted assault with a deadly weapon, was, after many withesses were examined in ludge Nash's court, discharged The trouble was over a car which the Arisona Eastern Railway company had spotted at Warrior siding for Frank Hubble, and which Mr.

#### EASTERN CAPITAL AFTER DALHART LAND

Well Is Down Over 2000 Feet—Promising Crop Outlook.

Dalhart Texas, May 22.—G. A. Dob-bins, land commissioner for the Capa-tol Freehold Land and investment company, of Chicago, III. in the city today with a party of eastern capital-lists negotisting for land in and around Dalhart. The parties are Pollsh repre-sentatives and are very favorably im-

sentatives and are very favorably impressed.

The Dallam county deep well is now down over floe feet. For the past few days 75 to 100 feet have been dug in soft granite. The first 1500 feet was through solid rock indications. A movement is now under way to induce the county to continue down another 1000 feet heyond the original contract, balleving that by going that depth water, gas or oil will surely be obtained. W. N. Stone, president of the Dalhart National bank, has returned from a lengthy trip through the agricultural belt of northern Texas. He finds the territory in an unusual advanced state and crops of all kinds looking fine. The great precipitations of the past spring placed the northern portion of the state in perfect condition for the largest crops in the history of the country.

Several years have clapsed since there has been so much activity shown by land seekers as at present, and the steel work on the new smelter being constructed by the Calumet and Art-Wednesday, and from this time on will probably be pushed with vigor. The fine dust chamber connecting with the hig stack foundation, was the initial But a small portion of the steel which will go into the frame work of the bis buildings of the reduction works has arrived up to this time. A large portion of it is on the road, however, from Kansas City, and from this morning on it is anticipated that sufficient material will be kept on hand to ensure steady progress. A targe shipment of heavier pleces is expected today. Most of the steel received up to this time, save that for the flue dust chamber, has been small or top piece variety.

here has been so much activity shown y land seekers as at present, and the ountry surrounding Dalhart has had few years surpassing the present one in point of crop conditions. The rain-fall this spring has been ample and placed the range and ranches in ideal condition for bumper crops.

FRANK HAWKINS IS ACQUITTED AT GLOBE

Hayden Peace Officer Gets Liberty-Hot Weather in Hayden Camp.

Hayden. Ariz. May 22 - Word is received here from Globe that the jury sitting in the Frank Hawkins trial declared him "not guilty" of murder. Hawkins was formerly deputy sheriff in Hayden, and on the evening of January 22, 1811, killed a Mexican. F. Frachamonte He was arrested immediately and tried, the jury at that time disagreeing, so was put back in fall awaiting another trial. Bonds were given at first, but later the judge decided that same were not in order and lead him placed back in jail, where he has been confined for the last 11 months. Buch interest has been taken in the case in this vicinity. It is reported that he intends to be married at once.

A. J. MacLean left yesterday for

A. J. MacLean left yesterday for Phoenix on business.

The Rev. Mr. Hawley, of Higley, was here holding his regular bimonthly service in the schoolbouse.

Mrs. E. G. Elliott, wife of the master mechanic for the A. S. & R. Co. has arrived from the coast and will make her future home in Hayden.

Mr. and Mrs. Julius G. Bergman have arrived from their short homeymoon trip to Phoenix.

G. R. Wimbish has left for points in Texas intending to be gone for a couple of weeks.

Dr. A. B. Rood, formerly of Ray, has occased dental parlors in the Adams block, pending the completion of the John Macintyre company building, where he will be located permanently. Charles McGee, one of the oldtimers of Arizona, paid a visit to Hayden yesterday, this being his first visphere. He formerly ran a stage line out of Kelvin, but for the list few years has been located in Phoenix.

The Hayden orchestra gave a dance to a very large crowd, several coming over from Winkelman to attend. They are intending to give one every Saturday evening from now on, at least until the warm weather prevents.

Yesterday was the warmest day Hayden has been favored with this year, the thermometer reaching the 100 mark.

BY WILLOX CLUB WOMEN

Willcox. Ariz. May 22—The first
year's work of the Women's club of
Willcox was fittingly closed with a
general reception following the regular business meeting and installation
of officers for 1912 and 1913. From
the annual reports of ifficers, it was
shown that this club, which was ofgenized in October, 1811, under the
capable leadership of Mrs. C. O. Anderson, had accomplished much earnest
work during its initiatory year, the
membership having increased from the
charter enrollment of 17 to its present number of 25.

The officers instaled for the coming
year are: Mrs. C. O. Anderson, president; Mrs. H. A. Morgan, first vice
president; Mrs. J. W. Mögre, second
vice president Mrs. A. L. Cropper, recording secretary, Miss Alberta Fulghitm, corresponding secretary; Mrs. 1.
E. Crowley, treasurer: Mrs. W. F. Bottman, auditor.

than, auditor.

Those contributing to the program of readings, violin and piano selections were Mrs. W. F. Bottmai, Mrs. E. A. Ely. Misses Giadys Dunlap, Irma Reller, Ada May Nelson, Helen Morgan and Mrs. C. M. Roberts. Following this program, an informal reception was beld, at which sherbet and wafers were served.

The afternoon brought tegether the representative women of the town, talley, nearby ranches and mining compa.
